

Enabling the best Nordic scale-ups to scale faster

Nordic Scalers is a programme founded by Nordic Innovation.

Less than 0.3% of Nordic companies are scale-ups. Nordic Scalers aim to change that by giving vital assistance to Nordic growth-companies with the highest ambition to scale.

The program uses proven growth methodologies to give your company structure as you're growing rapidly. You'll be supported 1:1 by coaches for additional guidance and expertise.

What you'll get

- Customised 1:1 advisory and sounding board
- Toolkits and frameworks to provide structure
- Expert talks and access to new networks
- Peer-2-peer knowledge sharing and learning

"This is both the worst and the best program I have ever been part of. The worst, because I'm confronted with all of the things about my company and customers that I don't know – and now realize that I should know. And the best, because I get the help I need to solve this in the Nordic Scalers program."

Secomea

"The Nordic Scalars Program far exceeded our expectations and we uncovered and overcame several obstacles that stood in the way of our growth. We gained a researched and well-backed growth plan including an updated business model, target group and value proposition. We are of course grateful and would definitely recommend the program to other scale-ups."

Alexander Åström, CMO at Gigstr
